SUMMARY

Frontend Developer skilled in building responsive, user-centric web solutions using React.js, HTML, CSS, and JavaScript. Experienced in developing role-based platforms, dashboards, and marketing websites, with expertise in API integration, state management, and cross-functional collaboration.

EXPERIENCE

Junior Frontend Developer
DayNight Technologies   February 2024 - Present, Gurugram

· Managed and customized CMS platforms for fintech and gaming clients, delivering responsive websites, real-time updates, and improved functionality while adhering to industry security and compliance standards.
· Designed , developed user-centric and pixel-perfect websites and dashboards from PSD designs and wireframes, implementing dynamic features like profile management, search and filter functionalities using HTML, CSS, Bootstrap, JavaScript, and React.js.
· Created engaging landing pages, email templates, and SEO- optimized websites for marketing campaigns, boosting user engagement and online presence for fintech and media clients.
· Collaborated with cross-functional teams, including designers, backend developers, and clients, to deliver visually appealing, performance optimized, and responsive web solutions.

Project Engineer Trainee
Wipro   January 2023 - April 2023

· The pre-joining training focused majorly on software development focusing on JavaScript, Java, OOPs,SQL Database and basics of OS , achieved 70-80% hands-on assignments, built several projects and portfolio during the training with self-learning

PROJECTS

Castfinder Platform
· Designed UI form PSD designs and developed a role-based responsive web platform to enable seamless interaction between talent and clients.
· Built the Talent Dashboard for actors/models to: create and edit profiles, upload portfolios, mark their availability, manage and track applications.
· Developed the Client Dashboard for casting directors/agencies to: post and manage casting opportunities, review talent profiles , track and manage progress efficiently.
· Created an Admin Dashboard with functionalities to: manage user accounts, monitor platform activities through detailed logs, dynamically update website content without altering the codebase.
· TechStack:- HTML,CSS,JS,React.

Movie & TV Show Streaming App
· Developed a full-featured movie and TV show streaming application with an intuitive user interface.
· Features :- Browse movies and TV shows by genres, categories (e.g., Top Rated, Now Playing). Search functionality by name and genre. Single movie/TV show page with detailed descriptions, trailers, and related recommendations. Bookmark and favorites functionality, with data persistence using Firebase Firestore.
· Fetched and managed movie/TV data using Axios instances from the TMDB API (API integration). Ensured responsive design and smooth user experience, customised theme switching.
· Technologies Used: React, Context API , Firebase Firestore, Axios, TMDB API Data Fetching , SCSS.

EDUCATION

Bachelor Of Technology(Computer Science & Engineering)
Asia Pacific Institute Of Information & Technology · Panipat,Haryana · 2022 · 8.8

SKILLS
